Memorandum

Date June 25, 2019

To: Jeffrey Bauer, Port of San Francisco

From: Seifel Consulting Inc.

Re: Review of FY 2019/2020 Monthly Rental Rate Schedule, Monthly Parking Stall Rates, Special Event and Filming Rates (Proposed Schedule)

At the request of Port of San Francisco staff, Seifel Consulting (Seifel) provided a due diligence review of the proposed Port parameter rate schedule—the FY 2019/2020 Monthly Rental Rate Schedule, Monthly Parking Stall Rates, Special Event and Filming Rates (Rental Rate Schedule). As further described in this memorandum, Seifel concludes that the minimum office, industrial/warehouse and parking rates recommended in the FY 2019/20 Rental Rate Schedule are generally reasonable and consistent with overall market trends in San Francisco and Port lease transactions undertaken over the past year.

To reach this conclusion, we performed the following steps:

- Reviewed the Port's proposed FY 2019/2020 Rental Rate Schedule and supporting information provided by Port staff.
- Reviewed last year's Port Commission staff report and the adopted FY 2018/2019 Rental Rate Schedule, as well as supporting materials.
- Discussed the Port's recent leasing activity with Port staff, as well as the market research that Port staff undertook to develop the proposed Rental Rate Schedule.
- Obtained and analyzed Port data on lease terms, rent roll and vacancy trends over the past two years.
- Obtained and analyzed relevant market data on office, industrial and parking uses in San Francisco.
- Surveyed and obtained current parking rates for properties that are owned by the Port and competitive parking facilities, updating the Port's prior 2017 parking survey data.

A. Purpose of Rental Rate Schedule

The Port of San Francisco owns and leases a diverse array of properties, many of which are located on piers along the waterfront. The Port directly leases space for office, industrial, warehouse, maritime, parking, special events, and film uses. In addition, the Port has entered into long-term ground leases with master lessees who have redeveloped Port properties, and these master lessees handle the leasing for these buildings, which include the Ferry Building, Pier 1 and Piers 1½-3-5.

The purpose of the annual Rental Rate Schedule is to establish minimum parameter rents for Port properties that will be directly leased each Fiscal Year in order to most effectively administer the leasing process. Each year Port staff performs an analysis to assure that the minimum rents in the Rental Rate Schedule are consistent with market rates for similar properties. Typically, an outside consultant is retained to review the parameter rent analysis prepared by Port staff, and Seifel performed this review over the past month.

Once the Rental Rate Schedule is approved by the Port Commission, Port staff may enter into new leases or lease renewals that equal or exceed the minimum parameters contained in the Rental Rate Schedule upon approval by the Port's Executive Director. The Port Commission must approve all leases that fall outside the parameters of the Rental Rate Schedule.

This process provides clarity and certainty to the Port Commission, tenants and staff. It also furthers the Port's goals to execute a holistic and balanced real estate strategy to most effectively maximize its asset values and income while retaining affordable business space for certain maritime uses, non-profit entities and single proprietorships, consistent with the public trust regarding waterfront land. The Rental Rate Schedule and the Port's leasing policies take into account these key Port's goals.

The Rental Rate Schedule is established as a minimum threshold, and Port staff may lease properties at the highest rate achievable from a new lease or lease renewal. Based on discussions with staff and review of rent schedules for properties leased over the past two years, we understand that Port staff has been able to successfully negotiate the majority of its leases with rents above the minimum rent levels. At the same time, Port staff negotiates rents that minimize periods of prolonged building vacancies and address the Port's goals to provide affordable business space for certain uses.

B. Market Assessment

Overall, the San Francisco real estate market is very healthy, buoyed by strong employment growth and low unemployment. According to the Bureau of Labor Statistics (BLS), the County of San Francisco maintains an unemployment rate of 2.1%, well below the United States national annual average of 3.3% for 2019. Local unemployment declined slightly in 2019, by 0.2% when compared to the same time period in 2018, according to BLS.

As shown on Exhibit 1 at the end of this memo, we reviewed market data for office and industrial properties from eight real estate companies actively engaged in leasing and selling real estate in San Francisco. In addition, we reviewed parking survey data assembled by Port staff and gathered current parking data through our own independent research. The findings from our research regarding the three major uses that are included in the Rental Rate Schedule are summarized below.

1. Office

As described earlier, the Port has entered into long-term leases with several master tenants who have redeveloped Port properties and manage their leasing. These properties primarily consist of Class A office space and retail uses that are managed by Equity Office Partners (Ferry Building), Prologis (Pier 1) and San Francisco Waterfront Properties (Piers 1½-3-5).

The Port does not directly lease any Class A office space, so the Rental Rate Schedule focuses on Class B and Class C office space. Class B and C office space has lower quality building finishes and building systems, which are reflective of their older building conditions.¹

In addition to office condition and age, location is the most important factor in the determination of rental rates for office space. Many of the Port's properties along the Embarcadero have excellent locations featuring beautiful water views, access to frequent transit, and proximity to San Francisco's financial district and major downtown amenities. This adds a premium to rental rates for certain Port properties.

¹ The Building Owners and Managers Association (BOMA) classifies office space into three categories: Class A, Class B, and Class C. BOMA states that Class A facilities have "high quality standard finishes, state of the art systems, exceptional accessibility and a definite market presence." For Class B, "building finishes are fair to good for the area and systems are adequate." Class C buildings attract "tenants requiring functional space at rents below the average for the area."

According to Port staff, demand for office space along the Port's waterfront has strengthened. The current vacancy rate for office space that is directly leased by the port is 3.4%, a substantial decrease from last year's vacancy rate. A significant portion of the Port's vacant space is located at Piers 19 & 23, which the Port is actively marketing for interim leasing related to the upcoming Historic Piers RFP process. Port staff proposes to increase the Rental Rate Schedule in FY 2019/20 for office space except for selected properties with special leasing characteristics, such as Pier 23.

Based on a review of office market data from the sources identified in Exhibit 1, San Francisco's office market remains strong. New supply of Class A office space has helped to meet strong office demand due to recent additions and planned construction. About 3 million square feet of Class A office space was slated for delivery by the end of 2018, and over 770,000 square feet of office space was in construction in early 2019. Even with the large scale of deliveries, the office construction pipeline remains robust with over 4.1 million square feet yet to be delivered.

Despite the significant increases in supply, vacancy rates for Class A and Class B office space have declined according to most brokerage firms over the past year. Brokerage firms differ with respect to how they are reporting vacancy rate trends for Class C office space, with some indicating decreases in vacancy rates while others reporting increases. The Port's overall office vacancy rate of 3.4% for its primarily Class B and C office space is within the range of vacancy rates reported by Cushman Wakefield, Colliers, Jones Lang LaSalle, and Kidder Matthews for San Francisco in Q1 2019.

Overall, office rents are reported to have increased over the past year, and the consensus among real estate professionals is that vacancy will continue to tighten in 2019 based on continuing strong demand. Most firms predict that office rents for all classes of office will likely increase in the near term, but Class C office space may experience market softening if tenants choose to relocate out of San Francisco rather than pay higher rental rates.

Based on a review of all of the office market data sources, Jones Lang LaSalle (JLL) had the best comparative data for all three office Classes (A, B and C) for 2018 to 2019. According to JLL, average rents for Class A and Class B office space increased from the first quarter of 2018 (Q1 2018) to Q1 2019, as vacancy rates declined over the past year. Average rental rates for Class C office space continued to increase despite a reported increase in vacancy rates for Class C space over the past year according to JLL.

JLL reports that average monthly asking rents for Class B space are approximately \$6.22/Square Foot (/SF) while asking rents for Class C space are \$5.55/SF as of Q1 2019. (These rent levels are typically reported on a full service basis versus triple net basis.) The vacancy rate for Class B space is significantly lower than for Class C space, at 6.6% and 10.6% respectively. (Of note, JLL is reporting the highest vacancy rate for Class C space of all the brokerage firms that reported data for Class C space.)

While the monthly minimum rents in the proposed Rental Rate Schedule are less than the average asking rents reported by JLL and other brokerage firms, we believe that the Rental Rate Schedule is reasonable given the advanced age of the Port's properties and the fact that many of the Port's piers are not in optimal physical condition. Furthermore, the Port rents most properties on a Triple Net Basis and has limited ability to fund tenant improvement costs upfront in contrast to private landlords who may provide a significant tenant improvement allowance to incentivize occupancy.

2. Industrial and Warehouse

The majority of the Port's industrial and warehouse space is located in Pier sheds that are categorized as Class C space. These properties have various levels of building improvements, ranging from large open shed spaces that may or may not include interior walls, partitions, fencing and utilities. The majority of the Port's properties lack loading docks, attached office space and non-permeable concrete floors, and many share a common drive aisle, some adjacent to busy streets.

Despite these conditions, the Port has been able to negotiate favorable rental rate terms for much of its industrial and warehouse space given the scarcity of industrial property in San Francisco and the location of a substantial amount of the Port's shed space along the Embarcadero, which is in close proximity to downtown San Francisco and Fisherman's Wharf.

According to Port staff, demand for industrial and warehouse space varies from building to building based on its location and building condition. The current vacancy rate for industrial and warehouse space that is directly leased by the Port has increased to 6%. The increased vacancy rate is primarily due to vacant space in the Northeast Waterfront at Piers 19, 23, 29, and 31, as capital repairs are still underway or are planned to occur in the near future at these piers. However, the Department of Elections will be occupying Pier 31 in the near future, and Piers 19 & 23 are being actively marketed, which is expected to reduce the Port's overall vacancy rate for industrial and warehouse space.

During the past year, Port warehouse rates have typically averaged \$1.60 to \$2.00 per square foot in northern waterfront locations except at Pier 45, which is leased at more favorable rates to the fishing industry. The Port typically leases industrial and warehouse spaces under "net" or "industrial gross" lease rates with tenants often having to invest in capital improvements before or during occupancy.

Based on surveys of rates at other California Ports and harbors and recent industrial market trends, Port staff is recommending increases in the minimum monthly lease rates for piers and sheds at Piers 33, 35 and 45 in the northern waterfront from \$1.50/SF to current market rates of \$1.60/SF in FY 2019/20. Port staff is recommending a slightly higher increase for most its major Ferry Plaza and South Beach piers and sheds from \$1.60/SF to current market rates of \$1.75/SF in FY 2019/20, reflecting their easier access to major transportation corridors and the continuing trend of industrial and storage space moving southward along the Embarcadero. Most of the remaining piers and sheds are proposed to increase between \$0.05–\$0.10/SF/month depending on their location, quality of space and access. Fishing gear storage for non-bertholders is proposed to increase by \$.25/SF/month, but the Port rarely leases to non-bertholders.

Based on a review of industrial market data from the sources identified in Exhibit 1, San Francisco's industrial market remains strong as supply continues to be constrained in relationship to demand, leading to historically low vacancy rates that are reported by most sources to average between 2% and 3%. This has made it difficult for industrial users to find well-located, quality space for lease. Low vacancy rates for industrial and flex spaces are expected to continue in the next few years.

Based on review of the industrial market data sources, Kidder Matthews (KM) had the best market data for industrial and warehouse space in San Francisco. Based on KM data, average monthly asking rents for industrial space in San Francisco increased from \$1.56 in Q1 2018 to \$2.72 in Q1 2019, while vacancy rates increased slightly from 2.1% to 2.6%.² Of note, KM reports industrial and R&D market trends for the combined San Francisco and Peninsula market (including San Mateo County) and forecasts continued strong demand, particularly from the life sciences sector.

The proposed lease rate increases for Port industrial and warehouse properties are reasonable, as they reflect tightening market conditions for industrial space in San Francisco while taking into account the unique users, locations and characteristics of each property.

² The *availability* rate for industrial space is 4.0% as of Q1 2019 according to KM. The availability rate is equal to the total amount of space that is currently being marketed for lease divided by the total amount of existing inventory.

3. Parking

The Port owns and operates a diverse set of parking facilities along the waterfront, and the vast majority of parking spaces are leased to Port tenants. The Port has an active waiting list for all of its parking facilities, as there is currently more demand than supply from Port tenants.

At the request of Port staff, we updated the Port's parking rate survey for Port owned and competitive parking facilities along the northern waterfront and in China Basin. Based on our 2019 survey, we found that parking rates for most facilities have either remained about the same or slightly increased since 2017. We concur with staff's recommendations regarding rental rate increases given the location of the Port's parking spaces and the fact that many of the Port's parking spaces are leased to tenants who utilize them for business purposes. We also believe that charging parking rates based on current market conditions is one of the most effective strategies to encourage tenants to factor in the real cost of their travel choices, which is a key strategy for the Port to utilize to manage transportation demand.

Port staff is recommending that the minimum parking rates be increased consistent with their location and use. For example: commercial tenants in the northern waterfront would pay \$320 to \$340 per month pretax or \$400 to \$425 per month inclusive of the City's parking taxes, which is within the current range of monthly market rates for most parking facilities surveyed in downtown San Francisco. Industrial trucking tenants in the Southern Waterfront would pay \$160 to \$200 per month pre-tax or \$200 to \$250 per month inclusive of the City's parking taxes, which is reported by Port staff to be the market rate in these locations. On the basis of the results of the parking rate survey and our recent work for the Port on parking and transportation demand management, we concur with Port staff's parking rate recommendations for the Rental Rate Schedule.

C. Conclusion

In conclusion, we find that Port staff's proposed minimum rates for office, industrial/warehouse and parking uses in the FY 2019/20 Rental Rate Schedule are generally reasonable and consistent with overall market trends in San Francisco and Port lease transactions undertaken over the past year.

Synopsis of Port Leasing Policies

The Port Commission has delegated authority to Port staff to execute certain leases, licenses and memoranda of understanding that meet the following criteria:

1. Use Type:

The agreement is for an office building or bulkhead office space, open or enclosed pier shed space, paved or unpaved open space, or open pier or apron space or roof-top space but is <u>not</u> for a retail use.

2. Use Consistency:

Except for temporary uses (with terms not exceeding six (6) months), the use under the agreement represents a like-kind use to the existing or the immediate prior use of the facility.

3. Assignments and Subleases:

Unless otherwise explicitly provided by the Lease, staff is authorized to consent to assignments and subleases on a form approved by the City Attorney and provided the terms and the conditions of the sublease or assignment complies with the terms and conditions of the Lease.

4. As-Is Execution:

The tenant executes the Port's appropriate* standard form agreement with no alterations except for minor changes approved by the City Attorney or changes in insurance requirements approved by the City Risk Manager.

5. Term Limits:

The term of the agreement does not exceed five (5) years, except for those leases in the Fisherman's Wharf Seafood Center at Pier 45 Sheds B and D that have a maximum lease term of ten (10) years (Port Resolution No. 94-122; Amended February 28, 2006, by Resolution No. 06-15). Leases for telecommunication sites may be up to nine (9) years (Port Resolution No. 96-123).

6. Select Tenant Improvement Allowance:

Port staff has the authority to issue tenant improvement allowances for floor and wall coverings if those credits do not result in the net rent over the term of the lease to be below the Minimum Net Effective Rental Rates found in the Rental Rate Schedule. Allowances for paint (amended June 8, 2010 by Resolution 37-10) up to a maximum of \$3.50 per square foot, and for floor covering, up to a maximum of \$5.00 per square foot (amended July 10, 2012 by Resolution 12-52), are allowable when: 1) new paint and/or floor covering is necessary in order to lease space in full service office buildings; and 2) Port staff is unable to perform such work prior to the proposed lease commencement date. These allowances are considered "landlord's work"; therefore such work is not included in calculating the minimum Initial Lease Rental Rates.

7. Limited Early Entry:

One month rent-free early entry to include rent abatement for each year of lease term may be granted, up to three months, for the purpose of space preparation (not to exceed three months). (Amended July 14, 2009 by Resolution No. 09-34).

8. Compliance with Laws:

The standard forms require compliance with all laws, explicitly including requirements for compliance with environmental laws including hazardous materials handling and cleanup; City zoning laws; the Port Waterfront Land Use Plan; and consistency and compliance with the Secretary of the Interiors' Standards for the Treatment of Historic Properties and the Port of San Francisco Historic Preservation Review Guidelines for Pier and Bulkhead Wharf Substructures.

9. Large Land Discount:

Port staff is authorized to offer a 5% discount for land transactions with minimum premises of 43,560 square feet and a minimum term of 36 months (Amended June 8, 2010 by Resolution 10-37).

10. Rental Rates:

The Port's leasing policy provides for an annual update of the Rental Rate Schedule. The Rental Rate Schedule sets ranges of minimum lease/license rental rates per square foot and ranges of Minimum Net Effective Rental Rates per square foot (if any rent credits are to be provided) by type of use and facility for office, shed and industrial space.

11. Reporting to Port Commission:

Port staff provides a monthly report to the Port Commission indicating Leases, Licenses, Memoranda of Understanding, consents to sublease, and assignments executed pursuant to this policy.

- 12. The City's administrative policy is to competitively solicit leasing opportunities, except where impractical or infeasible. The Port has a high volume of leases (about 550) for relatively small leased areas at nominal rental rates. To competitively bid such a large volume of leases would be impractical because the benefit of doing so does not outweigh the cost of resources that would be required just for this effort. Moreover, Port is generally able to accommodate most entities that wish to enter into leases for general special events, offices, and pier and open land storage space. As such, it is the policy of the Port not to competitively bid leases or licenses for special events, office, warehouse space, or unimproved land. Instead, for these fairly routine leases, the Port relies on the parameter rental rate structure that is based on an analysis of comparable rent charged in the private sector and/or based on existing conditions of individual properties as adjusted annually to reflect market conditions. However, where a business model is highly competitive and represents a major revenue opportunity for the Port (e.g., development opportunities, retail leases, parking lots, concrete batching, construction materials recycling), the Port would issue a competitive solicitation.
- 13. The Port's Executive Director is authorized to waive Public Art use fees in license agreements and MOUs under the following circumstances: (i) there are no other uses for the space during the term of the license/MOU that would generate rent to the Port; (ii) no uses would be displaced; (iii) the Port does not expend any or only minimal or incidental resources or revenues to support the installation; (iv) there is a direct benefit to the Port in that Public Art enlivens and attracts people to the waterfront, and (v) the sites that are most likely to be attractive for large scale public art, and that have adequate space for a variety of types of installations include: Pier 14, Cruise Terminal Plaza, Harry Bridges Plaza, Brannan Street Wharf, Crane Cove Park, and Heron's Head Park. Port staff would continue the practice of informing citizen advisory committees and presenting informational items on public art installations to the Port Commission. (Port Commission Resolution No. 15-21.)

14. The Port's Executive Director is authorized to waive Subsurface Utility Distribution Infrastructure use fees in license agreements and MOUs under the following circumstances: (i) the infrastructure is intended to be utilized in whole or in part for distribution of public utility or fire suppression services to the Port or Port tenants, (ii) the utility is located beneath a current or future street right of way that is not anticipated for any other use and the applicable federal, state or local governmental agency, commission, or department has maintenance and repair obligations for the infrastructure; (iii) the term of the real property agreement does not exceed 66 years (subject to Board of Supervisors approval if otherwise required due to the term); and (iv) any real property agreement includes requirements for the removal of such infrastructure if the street right of way is vacated or if the use is no longer consistent with the public trust at some point in the future. The delegated authority would not extend to the issuance of real property agreements for non-public utilities or utilities that primarily support revenue-generating enterprise activities; transmission only facilities (as opposed to distribution facilities) or telecommunications, cable or wireless services. Such agreements will continue to be subject to compliance with the parameters established by the Commission.
