PUBLIC MEETING 1

ISLAIS CREEK ADAPTATION STRATEGY

ARMY CORPS FLOOD STUDY

San Francisco
Planning

Thursday March 14, 2019
Bayview Opera House

MEETING AGENDA

- 1 Opening Remarks and Welcome
- 2 Climate Hazards & Citywide Resilience
- 3 Army Corps Flood Study
- 4 Islais Creek Adaptation Strategy
- 5 Workshop Exercise
- 6 Next Steps

TONIGHT'S OBJECTIVES

COMMUNITY MEETING 1

INFORMATION

Learn about the Army Corps Flood Study, Islais Creek Adaptation Strategy, and related resilience projects and efforts

PARTICIPATION

Engagement exercise to better understand what is important to Bayview community

DISCUSSION

Share outcomes of engagement exercise and what it means for equity, environment, economy, community, City and regional issues, priorities, and opportunities

FLOOD HAZARD

San Francisco faces increasing flood risk. Parts of the shoreline currently flood.

Increasing flood risks from sea level rise (SLR)

Up to 3 feet by 2050

Up to 6–10 feet by 2100

EARTHQUAKE HAZARD

San Francisco Bay Region Earthquake Timeline

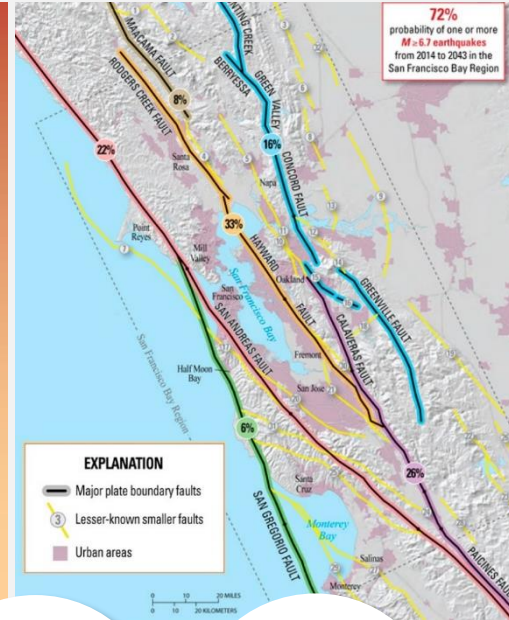

1850-1986 earthquakes from Bakun, W.H., 1990, Seismic Activity of the San Francisco Bay Region; Bulletin Seismological Society of America, v. 81, p. 704-714 and 1987-2014 earthquakes from the Northern California Seismic Network.

Likelihood of at least one earthquake greater than a given magnitude in the San Francisco Bay region between 2014 and 2043.

Magnitude (M)	30-year likelihood of at least one earthquake in the San Francisco Bay region
$M \geq 6.0$	98 percent
$M \geq 6.7$	72 percent
$M \geq 7.0$	51 percent
$M \geq 7.5$	20 percent

Timeline of magnitude 5.5 and greater earthquakes in the San Francisco Bay region 1850-2014. In the 50 years prior to 1906, there were 13 earthquakes with a magnitude between 6 and 7, but only 6 earthquakes of similar magnitude in the 110 years since 1906. The rate of large earthquakes is expected to increase from this low level as tectonic plate movements continue to increase the stress on the faults in the region.

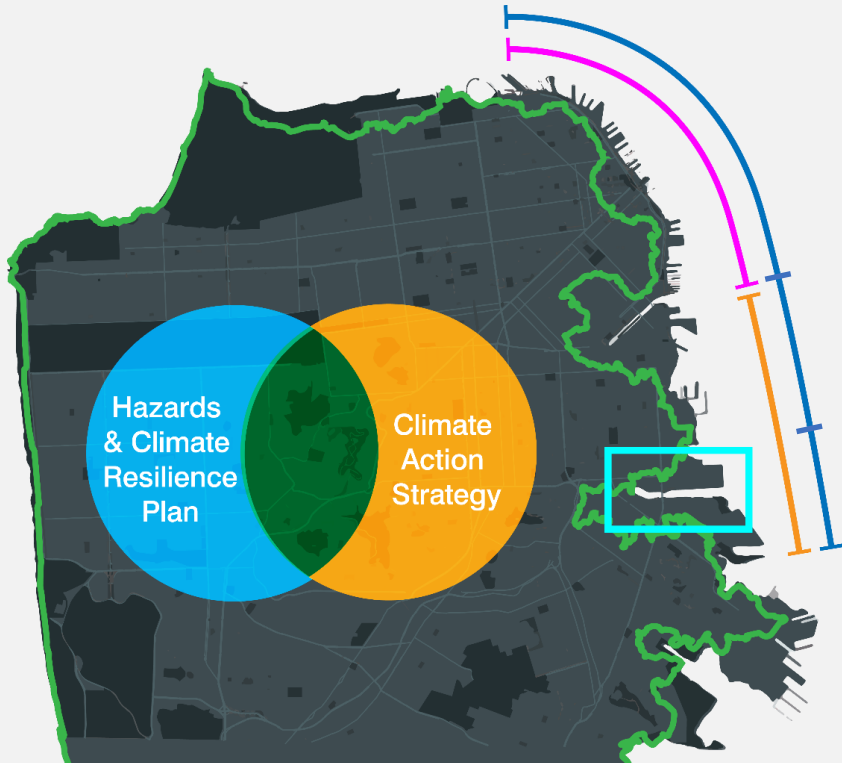

The likelihood of a major earthquake is high and the consequences are significant

72% likelihood of a major earthquake by 2043

Historically quiet period since 1906

San Andreas & Hayward Faults are highest risk

CITYWIDE RESILIENCE EFFORTS

SHORELINE

- Sea Level Rise Action Plan
- Southern Waterfront Assessment
- Seawall Safety Program
- Army Corp of Engineers Flood Study
- Islais/Southeast Mobility Adaptation Strategy

CITYWIDE

Islais Creek Adaptation Strategy

Southern Waterfront Assessment

PORT RESILIENCE FRAMEWORK

STRENGTHEN ELEMENT

Objective:
Immediately implement highest priority disaster response and life safety projects along the Embarcadero Seawall

Planning and Implementation Horizon:
2018 – 2026

Priorities:
Current Seismic & Flood Risk

Geographic Focus:
Embarcadero Seawall

STRENGTHEN THE SEAWALL FOR PUBLIC SAFETY

ADAPT ELEMENT

Objective:
Identify policies and projects that will result in a Port that is resilient to seismic and increasing flood risks and that can respond to changing priorities. Projects will be integrated into city, regional, and private actions, resulting in coordinated actions to increase waterfront resilience.

Planning and Implementation Horizon:
2018 – 2050, Plan updated every five years

Priorities:
Seismic Risk and Future Flood Risk

Geographic Focus:
Entire Port Jurisdiction

ADAPT TO MID-CENTURY RISKS

ENVISION ELEMENT

Objective:
Develop visions that can respond to remaining seismic risk and increasing flood risks and have an ongoing public conversation about the trade-offs of different options.

Planning and Implementation Horizon:
2018 – 2100, Vision Element updated every 10 years

Priorities:
Seismic Risk and Future Flood Risk

Geographic Focus:
Entire Port Jurisdiction

ENVISION THE WATERFRONT IN 2100

RESILIENCE PROJECTS SCOPE AND SCALE EXAMPLE

Asset: 3rd Street Bridge
System: Muni Metro
Hazard Reach: U.S. Army Corps Flood Study
Citywide: SLR and HCR

Efforts Underway Across Scales, Hazards & Assets

CITYWIDE PLANS & STRATEGIES

- Sea Level Rise Action Plan (Vulnerability & Consequence Analysis)
- Hazards & Climate Resilience Plan
- Climate Action Strategy

SHORELINE ASSESSMENTS & PROJECTS

- Southern Waterfront Assessment
- Embarcadero Seawall Program
- USACE/Port Flood Study
- Islais/Southeast Mobility Adaptation Strategy
- Ocean Beach Implementation

PROJECT RESILIENCE

PIER 70

- Mixed use development with 3000 homes, nine acres of parks
- Accommodates up to six feet of sea level rise
- Generates an estimated \$88 million to be used for adaptation

Projects are not able to address access, utilities and surrounding areas and services

PROJECT RESILIENCE

HERON'S HEAD LIVING SHORELINE

- Stabilize the southern shoreline of the park against ongoing erosion and subsidence
- Enhance biodiversity and ecological function of the site
- Enable the wetlands and park to adapt to a moderate amount of sea level rise through approximately 2050

RESILIENCE EFFORTS AT ISLAIS CREEK

Army Corps Flood Study

Focus: Flood Risk, Protecting assets in the Federal Interest and Identifying local priorities, Potential to qualify for Federal Construction \$

Implementation: Short, Medium and Long-Term

Southern Waterfront Assessment

Focus: All hazards, broad resilience (Equity, Environment, Economy)

Implementation: Short, Medium and Long-Term

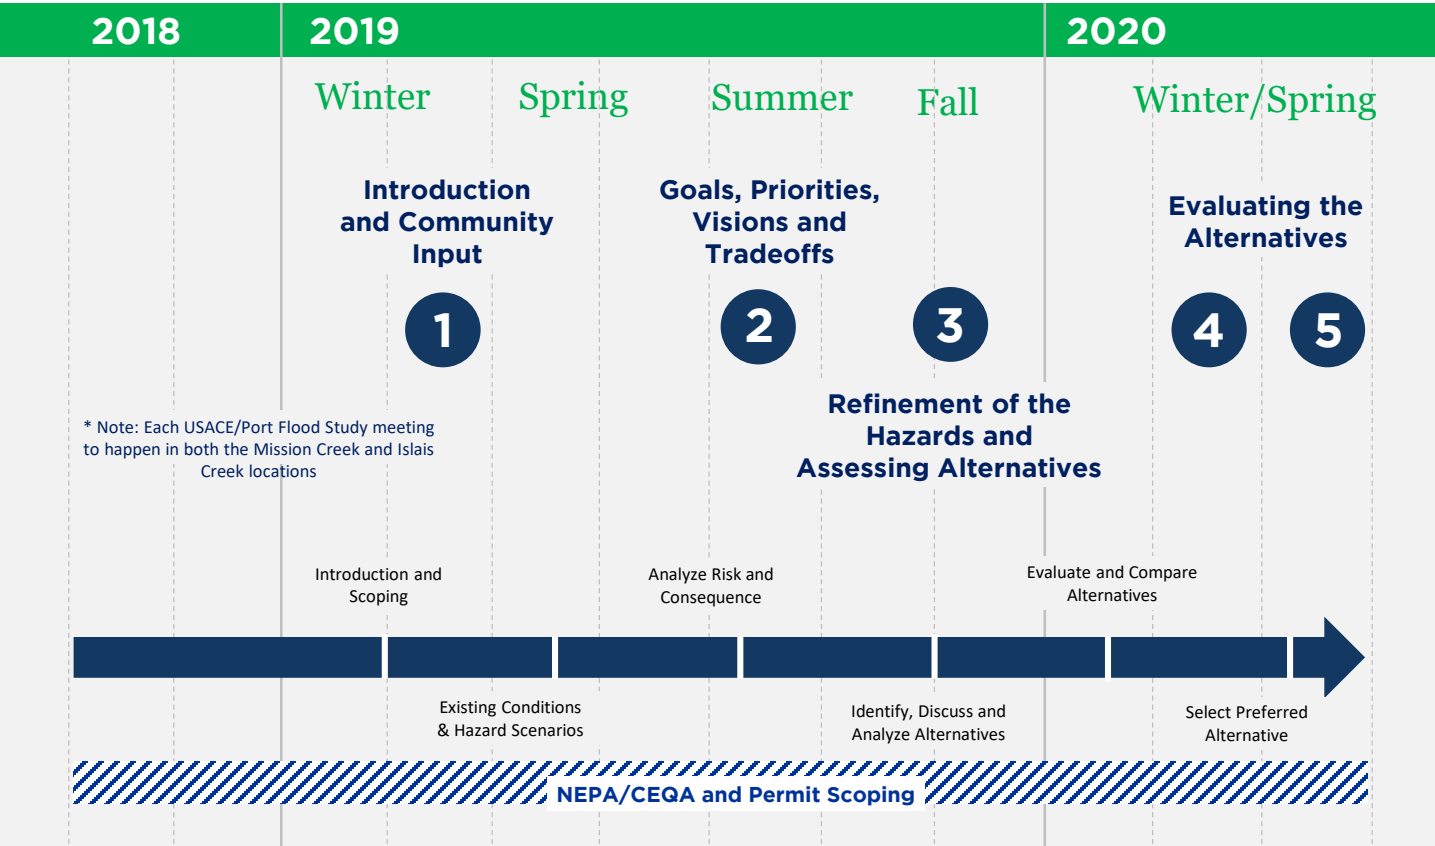

Islais Creek Adaptation Strategy

Focus: Reliable Transportation Systems, Social Equity

Implementation: Short, Medium and Long-Term

ISLAIS CREEK ADAPTATION STRATEGY PLANNING & ENGAGEMENT

FLOOD STUDY PUBLIC ENGAGEMENT

San Francisco
Planning

US Army Corps
of Engineers

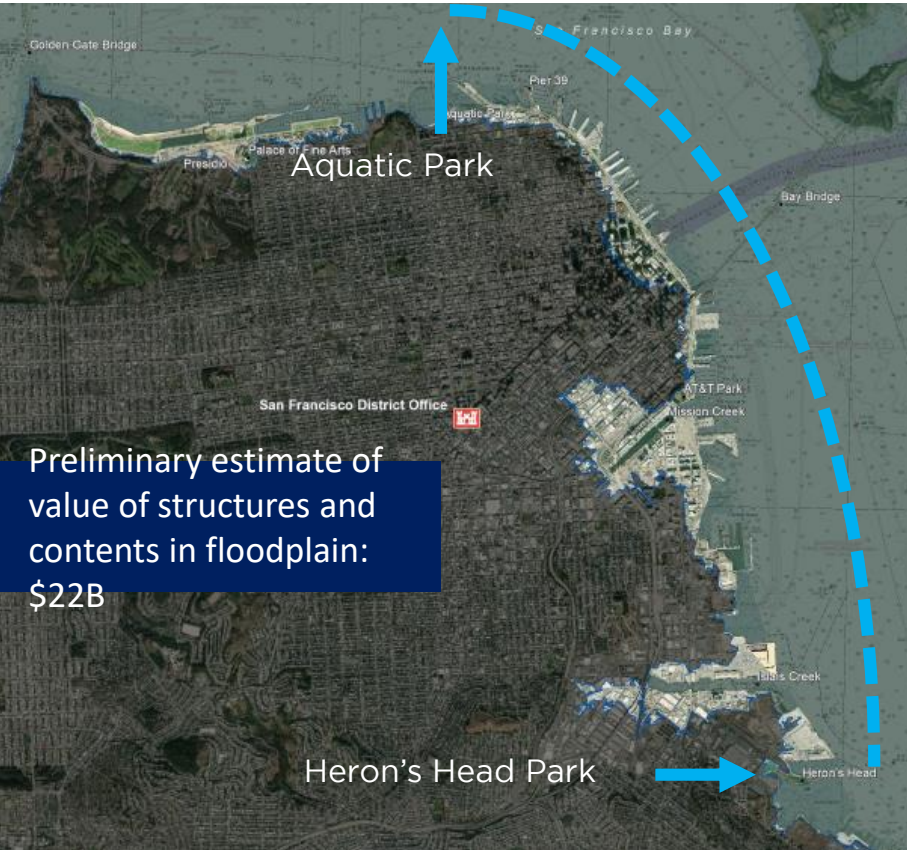

Public engagement and participation is how we get to a plan and a project.

Opportunities for participation will include community meetings held in adjacent neighborhoods, online engagement, and other activities throughout the study period.

Communities, businesses, and interested parties will be asked to help identify top priorities for

- FLOOD RISK REDUCTION for community assets, resources, and critical infrastructure.
- INVESTMENT in flood risk management and approaches that also achieve benefits for community, environment, and economy.

FLOOD STUDY AREA

Approximately 7½ miles of waterfront between Aquatic Park (to the North) and Heron's Head Park (to the South)*

- Area based on preliminary assessment of coastal flood risk
- Significant cultural, historic and maritime assets
- Critical public infrastructure, including local and regional transit (above ground, below ground, and ferries) and wastewater treatment
- Dense residential, commercial, and industrial land use

FLOOD STUDY OVERVIEW

Approximately three to five year study (2018-2022) of flood risk along the San Francisco Bay shoreline which includes

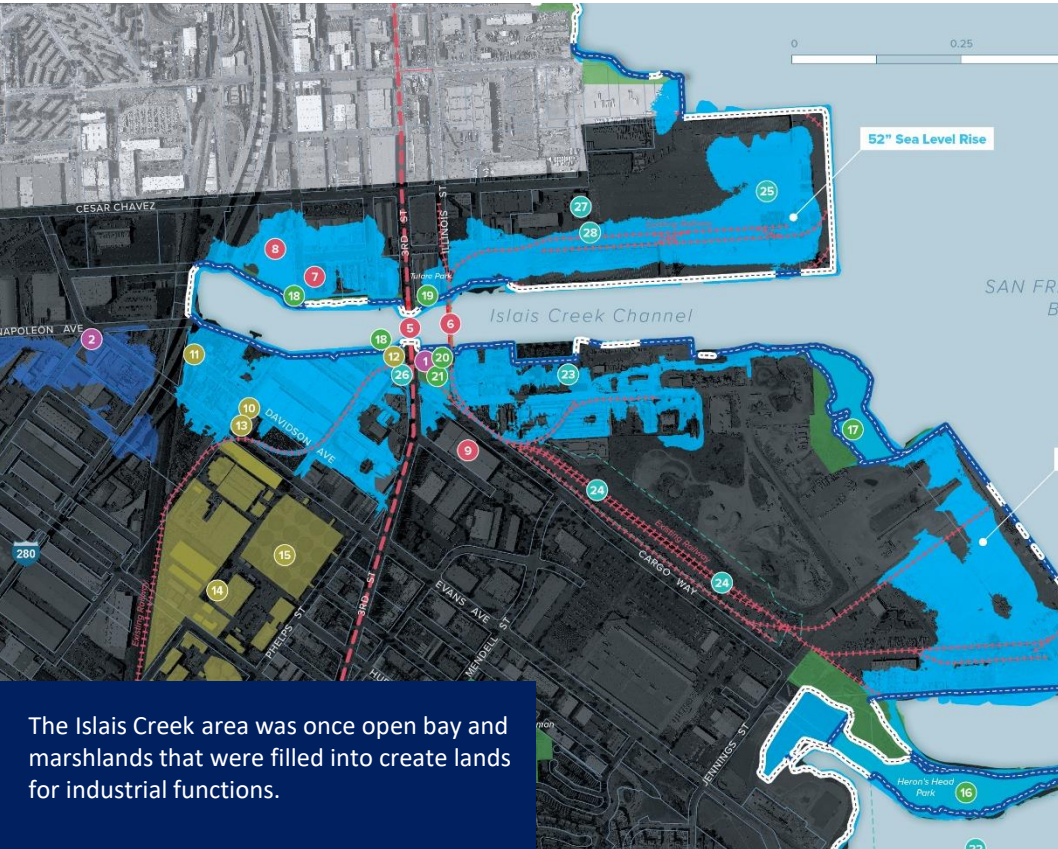

- Army Corps experience and expertise
- Funding for the assessment of flood risk and the identification of a preferred alternative that becomes eligible for Federal funding
- A requirement to identify risks to Federal interest, which drives the project that can be funded

FLOOD STUDY GOALS

- Better understand current and future flood risk along San Francisco's Bayside shoreline
- Identify alternatives to reduce flood risk
- Engage the public and other stakeholders to identify priorities for the Flood Study
- Create opportunities for funding for flood risk reduction projects

UNDERSTANDING THE HAZARDS AT ISLAIS

The Islais Creek area was once open bay and marshlands that were filled into create lands for industrial functions.

EARTHQUAKE RISK

Evaluate existing information to develop an understanding of the seismic risk, including ground shaking and liquefaction in the project area.

FLOOD RISK

Evaluate extent of coastal flood hazard to estimate damage to exposed assets.

UNDERSTANDING ASSETS & SERVICES AT ISLAIS

The Port and the Army Corps are collecting information on existing assets with City agencies, partners and community stakeholders

INFRASTRUCTURE

URBAN AND CULTURAL

PARKS AND ECOSYSTEMS

MARITIME

DISASTER RESPONSE

FLOOD STUDY FUNDING

COST OF STUDY

DESIGN/CONSTRUCTION OF FEDERAL PLAN

Locally preferred plan
can be selected,
City/Port pays extra cost

Recommendations for
funding the selected
alternative will be made in
the final Army Corps
recommendation to Congress
in 2022 or later.

FLOOD STUDY OUTCOMES

- 
- A refined understanding of the hazards
 - A refined understanding of the assets and services at risk and the consequences of disruption and damage
 - Engagement with stakeholders to define goals, priorities and issues
 - Education and outreach
 - Identification of risk reduction alternatives
 - Selection of a preferred alternative
 - Federal expertise and possible funding for that preferred alternative

FLOOD STUDY PUBLIC ENGAGEMENT

San Francisco
Planning

MEETING 1

Let's build this together!

Learn about the project and provide input on study priorities. Share how you want to stay engaged.

MEETING 2

Shape study goals!

Review draft goals based on participation from Meeting 1 and a discuss how goals could guide near, mid and long term alternatives.

MEETING 3

Envision alternatives!

Begin to envision alternatives for addressing the flood risk and prioritize action based on risk and the priorities identified in the first two meetings.

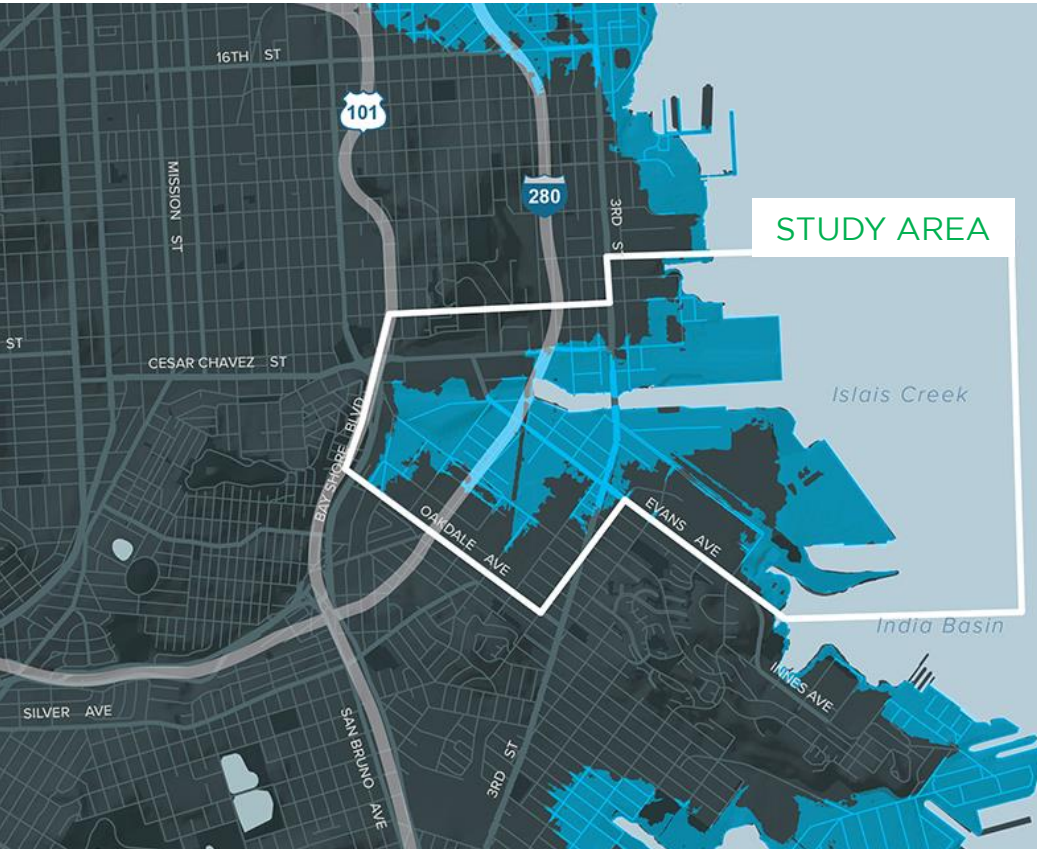

There will be other opportunities for engagement, including meetings in the field, tours and charrettes. Your suggestions are welcome!

OPPORTUNITIES TO ENGAGE IN RESILIENCE EFFORTS

- **MAP THE WATERFRONT ASSETS!** sfseawall.com
- **OUTREACH**
 - Waterfront Resilience Webinar
Wednesday March 27
1 - 1:30 PM
 - Let us know where we should go- community events, meetings, organizations
 - Let us know how you want to engage- field visits, smaller technical or policy briefings, hosting or participating in community led events

RESILIENCE EFFORTS AT ISLAIS CREEK

ISLAIS CREEK ADAPTATION STRATEGY

GOALS

- 1** Develop strategies for a resilient, safe, and reliable multimodal transportation system that accommodates projected population and job growth
- 2** Engage community members, especially those who are vulnerable and disadvantaged, in all phases of the project to ensure that local expertise is included
- 3** Produce both site-specific district-wide strategies
- 4** Prioritize Actions for near, mid, and long-term implementation
- 5** Identify other co-benefits such as increased wildlife habitat, ecosystem functions, and expanded open space
- 6** Identify other co-benefits such as more jobs, and of greater diversity, in the project area

ISLAIS CREEK ADAPTATION STRATEGY

PLANNING & ENAGEMENT

Workshop #1: Mapping Assets: March 2019

Workshop #2: Establish Adaptation Goals, Priorities, and Tradeoffs: Summer 2019

Refinement of the Hazards and Assessing Alternatives: Fall 2019

Workshop #3: Develop District-Scale Design Alternatives: Winter 2020

Workshop #4: Adaptation Designs for Specific Sites: Winter 2021

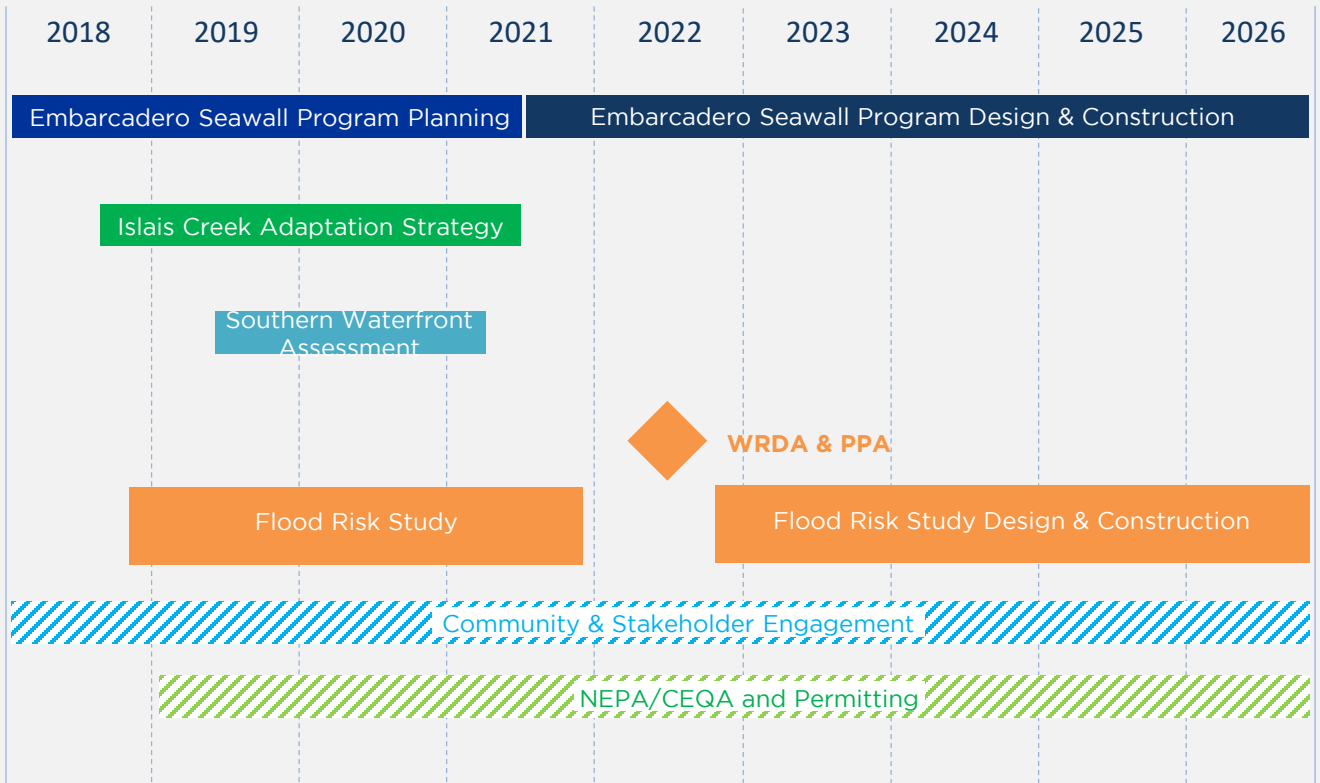

Youth Engagement: Spring 2019, Fall 2019, Spring 2020

Community Ambassador Working Groups: Summer 2019 – Fall 2020

Other engagement opportunities TBD

SAN FRANCISCO SEA LEVEL RISE ACTION PLAN

WORKING TOGETHER TO BUILD SAN FRANCISCO'S RESILIENCY TO SEA LEVEL RISE | MAR 2016

MISSION CREEK

SEA LEVEL RISE ADAPTATION STUDY
WATERFRONT STRATEGIES FOR LONG TERM URBAN RESILIENCY | SEPTEMBER 2016

PIER 70: CRANE COVE PARK AND PIER 70 WATERFRONT PARK
San Francisco, Central Bayfront

Crane Cove Public Park, Part of SF
The design accommodates and enhances SLR by reconstructing major portions of the pier to enable recreation and water uses, as well as integrate the growing urban Bay to increase portions of the site. The report includes recommendations for parking, bike, and the urban structure improvements provided by coastal infrastructure.

Pier 70 Seawall (the District 0202)
The OUE's innovative waterfront planning provides safe and desirable public enjoyment of the Bayfront while accommodating potential future SLR conditions. The design incorporates a variety of green treatments, responding to specific site conditions, based on the principle of "living with the Bay" and managed retreat a distance zone ahead for creative adaptation to SLR rather than over-engineering spaces now.

FLOOD HAZARD: *SEA LEVEL RISE*

**Sea Level is on the rise &
we're running out of time!**

History:

- 8 inches from 1900 to 2000

Future:

- 1 to 2 feet by 2050
(CCSF 2016)
- 3 to 5.5 feet by 2100
(CCSF 2016)
- New CA guidance up to 10 ft
by 2100 (H++)

FLOOD HAZARD ZONES: *Current (6 inches of SLR)*

CURRENT (2019 - 2030)

Immediate Flood Hazards:

- Parts of Mission Bay
- Pier 96
- Heron's Head Park

FLOOD HAZARD ZONES: *Near Term* (Up to 1 foot of SLR)

Near Term Flood Hazards:

- CalTrain King Street Station Yard
- Pier 80
- Islais Creek Industries

FLOOD HAZARD ZONES: *Mid-Term* (Up to 3 feet of SLR)

Mid Term Flood Hazards:

- Mission Bay
- SOMA Neighborhood
- Islais Creek Industrial Area

FLOOD HAZARD ZONES: *Long-Term* (Up to 5.5 feet of SLR)

Long Term Flood Hazards:

- Mission Bay
- SOMA Neighborhood
- Islais Creek Industrial Area

FLOOD HAZARD ZONES: *H++ Scenario* (Up to 10 feet of SLR)

H++ Flood Hazards:

- Mission Bay
- SOMA Neighborhood
- South East Wastewater Treatment Plant
