PROJECT SCOPES

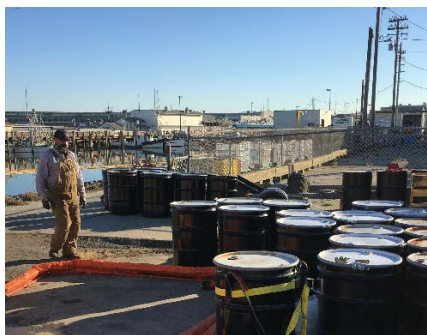

As-needed work tasks under this contract will fall into the following scopes. Tasks may be pre-scheduled or needed on an emergency basis.

Scope 1: Regulated waste profiling, removal, transportation, and disposal. Includes tank and vault cleaning, which may involve confined space entry.

Scope 2: Hazardous materials abatement and demolition over land and water. Includes buildings, marine structures and excavation, transportation, and disposal of contaminated soils.

Scope 3: Marine spill and sunken vessel response and recovery.

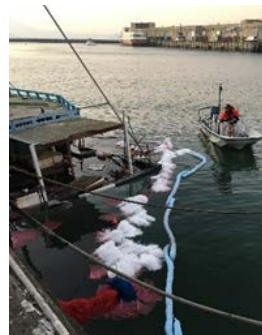

Scope 4: Confined space entry stand-by safety and rescue support.
